

# Faridabad Malls Strong on Infra

» Continued from Page 1

- ACCORDING to Sunit Sachar, senior vice president, (marketing, communication and advertising), Parsvnath Developers, "The total plot size of our two malls is 6,600 sq feet and total building area is 1,50,000 sq feet." "SRS operates in approx 1.2 million square feet of retail space. We have close to ₹4 lakh square ft of built-up commercial space, which includes SRS Mall and SRS IT Tower," said Jindal.

## MAINTENANCE MATTERS

According to the mall developers, maintenance cost of most of the operational shopping malls in Faridabad is in the range of ₹17-₹20 per sq ft. The cost eventually counts in the overall upholding of infrastructure. Jindal said, "SRS has its own facility management team and does not outsource any of its maintenance activities, which not only enables us to maintain quality but also keep the costs controlled, helping us becoming even more profitable compared to other malls in the city."
